AP ENPS is the one system for your entire news organization whether they are working in the field or in the office. No matter where the AP ENPS user is, they can create content for your broadcast or digital platforms. AP ENPS Anywhere is enhanced with the world’s best mobile functionality. Send video and photos, create and edit stories, access planning, rundowns, contacts, news wires and message co-workers, all from your smartphone or tablet.

AP ENPS features a host of well-designed tools, including integrated two-way social media engagement; collaborative storyboards; personalized dashboards; a detached alert bar for messages and urgent news wires; a suite of mobile tools for smartphones, tablets and laptops; multi-location search; and the ability to upload media directly from wherever you are into stories back at home base.

AP ENPS also has proven integration with more than 50 media systems and products — audio, graphics, prompters, video, robotics and more. With unlimited scalability, your virtual newsroom can link journalists across the globe or across town, and exclusive AP ENPS buddy server technologies mean you never lose your ability to go-on-air.

Now more than ever, AP ENPS Anywhere is the news production system for today’s multiplatform newsrooms.

Multiplatform integration
AP ENPS is designed to be the entry system journalists need to create and publish content for multiple news platforms. Broadcast, Web, mobile and social media. Start with any platform and quickly create multiple versions of a story anywhere you need.

Collaborate with story-centric workflow
AP ENPS is a seamless, story-centric workflow that makes journalists more efficient than ever before. Almost any window can be docked to the bottom of the screen for quick access when you need it. Side-by-side editing windows make it easy and efficient to create multiple versions of one story for different platforms.

– The dashboard lets you stay on top of what’s important to you. It has up to 12 windows that you can customize to track real-time updates as stories develop and to watch new content arrive.
– Drag and drop media from the field directly into AP ENPS, integrating it instantly to compatible media systems.
– The enhanced wire viewer lets you easily save stories for later review and editing.
– Never miss breaking news with the Alert Bar, which is always visible at the top of your screen. Internal messages and urgent wire stories remain right where you need them.
– AP ENPS provides unmatched search capabilities — one query pulls up text, video, graphics and archives from anywhere in your system, including a single-search across all connected AP ENPS locations.

Engage your audience through social media
Keep your social media communications inside AP ENPS. Make your audience part of the story with two-way social media integration. Engage with them on Twitter and Facebook from inside a story, driving your coverage forward with feedback directly from your audience. Easily see the social activity within each story as well as across the Social Media Dashboard. AP ENPS allows posting from within AP ENPS to a full suite of platforms, including Twitter and Facebook from inside AP ENPS. Make your audience part of the story with two-way social media integration.

Calendar-based planning
Integrated calendar-based planning makes it simple to manage coverage across your organization. View planning by the day, week or month; display multiple planning grids with information from different locations in your newsroom in a familiar, user-friendly format. It has up to 12 windows that you can personalize to track real-time updates as stories develop and to watch new content arrive.

Trust your election coverage to AP ENPS Stats
Take the hassle out of election night production. AP ENPS Stats automatically ingests the AP election wires and formats the races for output to broadcast and Web. Stats also allows local race input.

AP ENPS Mobile
Never miss breaking news with the Alert Bar, which is always visible at the top of your screen. Internal messages and urgent wire stories remain right where you need them. With the touch-friendly interface, staff can write stories for any platform, upload photos and video from the field, see recent updates on changes for breaking news, monitor assignments and rundown; send messages to co-workers, and access contacts, social media and other elements directly from AP ENPS. The Tablet Story Viewer (TSV), a native app, makes it easy to manage coverage across your group.

* AP ENPS Mobile version 3 runs on current versions of Chrome, IE, Safari (for iOS and OS X) browsers. The Mobile native app requires Apple iOS 6+ or Android 4.4+.
The right tools to tell a better story

The modern AP ENPS interface provides each user with the flexibility to control how and where content is displayed. Almost any window can be detached to use the extra workspace of multiple monitors. Windows can also be docked to the bottom of the screen for quick access when you need it. Side-by-side editing windows make it easy and efficient to create multiple versions of one story for different platforms.

Keep your social media conversations inside AP ENPS. Make your audience part of the story with two-way social media integration. Engage with them on Twitter and Facebook from inside a story, driving your coverage forward with feedback directly from your audience. Easily see the social activity within each story as well as via the social media dashboard. All corporate social postings from within AP ENPS show a full audit trail of who posted what and when.

Collaborate with story-centric workflow

AP ENPS is a story-centric workflow that makes journalists more efficient than ever before. Create story components on the planning desk that flow through to reporting, production and publication on any of your information platforms. Editors, producers, and reporters in all parts of your news organization are empowered to share and collaborate, whether in the same room or on the other side of the world.

A cornerstone of the story-centric workflow is the exclusive AP ENPS Storyboard. Storyboards are unique collaborative workspaces where you can easily find and share information, videos and other elements of the day’s big story. Storyboards and story components can be dragged and dropped into a story. They let you create an instant community of journalists working on the same story, allowing quick communication and ensuring everyone has access to real-time developments as they happen.

Multiplatform integration

AP ENPS is designed to be the only system journalists need to create and publish content for multiple news platforms: broadcast, Web, mobile and social media. News and story updates can flow through to reporting, production and publication on any platform and quickly create multiple versions of a story anywhere you need it.

AP ENPS Mobile

News doesn’t happen in the newsroom. With AP ENPS Mobile, your staff will be productive in or out of the office with the AP ENPS functionality they need, anywhere they need it. With the touch-friendly interface, staff can write stories for any platform, upload photos and video from the field, or review updates on changes for breaking news, monitor assignments and rundowns, send messages to co-workers, and access contacts, news wires and Twitter feeds from smartphones, tablets, laptops and desktops. “The AP ENPS Mobile app for iOS and Android devices adds to the power of the mobile connectivity.”

With the Skyline Story Viewer (TSV), anchors and reporters can edit, read and review stories directly from their iPad or Android tablet — no more paper scripts. Story changes are updated instantly. The TSV also caches the content of the rundown, so the latest version of the story is available even if the wireless connection is interrupted.
