

ENPS STATS

ENPS Stats will help you take control on election night.

Once you have ENPS, you have ENPS Stats. It's built into the system, which means less time for setup and retraining, and more time to think about election-night coverage. It also means that race results are available everywhere in your newsroom. Use Stats to report the national and state races covered by AP and tabulate your local races. Stats gives you easy output to the Web or on-air CG systems.

Benefits and Essentials

- > Works seamlessly with AP Election Wires.
- > Sends race results directly to CG.
- > Organize different types of races together for easy reference.
- > Automatically create races after wire capture is complete.
- > Create simple or detailed result fields.
- > Automatically select winner when all votes are reported.
- > Highly customizable display options and templates.
- > Manage output from your ENPS rundown.
- > Send results to multiple CGs.
- > Automated HTML export for online updates.
- > Automated export to SQL database for custom applications.
