

ENPS FACTS

ENPS is the world's most popular news production system, used by more than 60,000 reporters, writers, editors and producers to create more programming than all other systems combined. At the heart of demanding newsrooms in 60 countries, its powerful, easy-to-use features are built on a scalable, dependable architecture and promote unrivaled integration.

Features

- > Broadcast, Web and mobile story production means one system for users to master, one system to maintain, and faster breaking news and updates.
- > Easy to learn, providing centralized control of newsroom and production resources.
- > Off-the-shelf desktop and server hardware and operating systems support multiple platforms – personal computers running Windows, with options for Mac, Web and mobile device users.
- > Simple drag-and-drop productivity, maximizing screen space on multiple monitors with detachable rundowns and planners.
- > Streamlines workflow and communication, with multiserver, multisite design so users in several locations can collaborate as a virtual interconnected newsroom.
- > Instant indexing of every word of everything, with Top-Line Bulletins watching the news wires for urgent material.
- > Powerful search technology so you can find anything, anywhere, even on external systems. Saved Searches and Forward Searches watch your favorite topics and immediately alert you to breaking news.
- > Story composition, with built-in spell checking, a the-saurus and a pronunciation guide. Automatic save/ restore, automatic script timing and on-screen font sizing. Version control, so you'll know who changed what and when.
- > Rundowns and digital content collections, with user-defined display layouts and fields, real-time status and color-coded approval indicators, and interfaces to broadcast production tools and web content management systems.
- > A full suite of add-on components for Mobile and Web access, elections, school closings, Web publishing, and receiving email and faxes.

- > Planning and Contacts management.
- > Keyboard shortcuts and user-defined macro keys.
- > Built-in browser to access the Internet and other external resources, click on links in news stories, and drag text into scripts, subscribe to RSS feeds.
- > Instant user-to-user and group-based Top-Line Messaging, with optional attachments of scripts, rundowns, wire stories or media clips and Follow-Me Messaging for users who've left the newsroom.
- > Custom user access/security and privilege levels.
- > Private work areas for each user and public areas for each group.
- > Integration with products from more than 100 companies, supporting "best-fit" solutions that meet your needs and your budget – even powerful consumer applications such as Final Cut Pro.
- > No-compromise remote access, plus off-line capability for working from disconnected laptops.
- > Support for more than 60 languages, with universal Unicode compatibility.
- > Unique, redundant, fail-safe buddy server architecture for live backup systems.
- > Automatic archiving.
- > Built-in help, 24x7 live support, and many training options.
- > Software updates at no additional cost.
- > Search function
- > Group-wide
- > Collaboration
- > Web publishing
- > Third-party vendor
- > integration via MOS

The Associated Press is the essential global news network, delivering fast, unbiased news from every corner of the world to all media platforms and formats.
